

## CLAIMS

What is claimed is:

21. An organizer assembly comprising;
- 5 a backboard (12) for mounting to a structure, and
- a shelf (16) for projecting from said backboard (12),
- a backboard connector (26) and a shelf connector (28) that
- mechanically interconnect with one another for supporting said shelf (16) in a
- cantilevered position extending forwardly from said backboard (12),
- a hanger disposed on said shelf (16) for engaging said backboard
- 10 connector (26) for removably supporting said shelf (16) in a storage position
- extending parallel and in overlapping relationship to said backboard (12).
22. An assembly as set forth in claim 21 wherein said hanger includes a
- projection (58) disposed on said shelf (16) for engaging said backboard connector
- 15 (26) for supporting said shelf (16) in said storage position.
23. An assembly as set forth in claim 22 wherein said backboard connector
- (26) includes a pair of embossments spaced laterally from one another and each
- having a top (30) and spaced sides (32) with a pair of flanges (34) extending in
- 20 opposite directions from said sides (32) to define inside grooves facing one another
- and outside grooves, including a pair of said projections (58) with said projections
- (58) being in sliding engagement with said grooves.

24. An assembly as set forth in claim 23 wherein said embossments include a bottom (60) at the lower extremity of each of said inside facing grooves and said pair of projections (58) extend in opposite directions from said shelf (16) for sliding engagement with said grooves and resting upon said bottoms (60) for  
5 suspending said shelf (16) from said backboard (12) in said storage position.

25. An assembly as set forth in claim 24 wherein said shelf connector (28) includes a pair of C-shaped channels each with a cover (36) and opposing tongues (38) for sliding said tongues (38) into said grooves with said cover (36) engaging said  
10 top (30) for supporting said shelf (16) in said cantilevered position.

26. An assembly as set forth in claim 25 including a detent (40) disposed for retaining said shelf (16) in said grooves.

15 27. An assembly as set forth in claim 26 wherein said shelf (16) includes a shelf surface (42) with a back wall (44) extending between ends and sidewalls (46) having upper and lower edges (50) extending forwardly from said ends of said back wall (44), said C-shaped channels being disposed in said back wall (44).

20 28. An assembly as set forth in claim 27 including mounting holes (70) extending thorough said embossments for mounting said backboard (12) to a structure.

29. An assembly as set forth in claim 24 wherein said backboard (12) includes an upper shoulder (20) and a nose (22) extending upwardly from said upper shoulder (20) and defining a hole (24) therethrough.

5           30. An assembly as set forth in claim 29 including a wrapper surrounding said backboard (12) and said shelf (16) in said storage position and engaging said upper shoulder (20) and defining an opening with said nose (22) extending therethrough.

10           31. An organizer assembly comprising;  
a backboard (12) for mounting to a structure, and  
a shelf (16) for projecting from said backboard (12),  
a backboard connector (26) and a shelf connector (28) that  
mechanically interconnect with one another for supporting said shelf (16) in a  
15 cantilevered position extending forwardly from said backboard (12), and  
a hanger disposed on said shelf (16) for engaging said backboard  
connector (26) for removably supporting said shelf (16) in a storage position  
extending parallel and in overlapping relationship to said backboard (12),  
said backboard (12) including an upper shoulder (20) and a nose (22)  
20 extending upwardly from said upper shoulder (20) and defining a hole (24)  
therethrough for hanging said backboard (12).

32. An assembly as set forth in claim 31 including a detent (40) for retaining said shelf (16) on said backboard (12).

33. An assembly as set forth in claim 31 including a wrapper surrounding said backboard (12) and said shelf (16) in said storage position and engaging said upper shoulder (20) and defining an opening with said nose (22) extending therethrough.

5

34. An organizer assembly comprising;  
a backboard (12) for mounting to a structure, and  
a shelf (16) for projecting from said backboard (12),  
a backboard connector (26) and a shelf connector (28) that mechanically interconnect  
10 with one another for supporting said shelf (16) in a cantilevered position extending  
forwardly from said backboard (12),

said backboard connector (26) including a pair of embossments spaced  
laterally from one another and each having a top (30) and spaced sides (32) with a  
pair of flanges (34) extending in opposite directions from said sides (32) to define  
15 inside grooves facing one another and outside grooves, and

said shelf connector (28) including a pair of C-shaped channels each  
with a cover (36) and opposing tongues (38) for sliding said tongues (38) into said  
grooves with said cover (36) engaging said top (30) for supporting said shelf (16) in  
said cantilevered position.

20

35. An assembly as set forth in claim 34 including a pair of projections  
(58) extending from said shelf (16) with said projections (58) being in sliding  
engagement with said grooves for suspending said shelf (16) in a storage position  
extending parallel and in overlapping relationship to said backboard (12).

36. An assembly as set forth in claim 35 including a detent **40** for retaining said shelf **16** on said backboard **12**.
